

Engineer (Project)

Job ID
388168BR
May 16, 2025
Belgium

Summary

We are looking for a Project Engineer responsible for managing CAPEX projects in various areas, such as process piping (clean and non-clean), HVAC installations, civil works, clean rooms, and utility equipment for both GMP and non-GMP areas.

About the Role

Key Responsibilities:

- Create project cost estimates, business cases and implementation planning
- Generate all necessary project management documents such as project charters, project scope statements and investment requests
- Determine and evaluate technical solutions
- Produce, review, and approve project-based drawings, lists, schedules, diagrams, layouts, calculations and datasheets
- Handle project HSE management and conduct project safety reviews
- Conduct FAT/SAT/commissioning of new equipment in the project including supervising installation
- Address project deficiencies and deviations

Essential Requirements:

- A degree in Industrial Engineering or equivalent
- At least 5 years of engineering experience, with 2 years spent on investment projects in the Chemical or Pharmaceutical industry
- Deep knowledge of HSE and GxP/QA
- Strong collaboration and interpersonal skills
- Proficiency in English and Dutch

Desired Qualifications:

- Demonstrated skills in project management
- Wide-ranging interdisciplinary knowledge
