NOVARTIS

Principal Biostatistician

Job ID
REQ-10012580
Nov 29, 2024
China

Summary

About the role:
Leads implementation of modern and innovative clinical trial/experimental designs, statistical models, analyses and data exploration at the study level.

About the Role

Key Responsibilities

• Provide input on statistical scientific and operational aspects of the planning, design and reporting of trials/programs

• Provide statistical expertise to support submission activities and documents, meetings with and responses to Health Authorities and other drug development activities, as required

• Collaborate with clinical, regulatory and other strategic functions to drive quantitative decision making. Explain statistical concepts in a manner easily understood by non-statisticians

• Collaborate cross-functionally (e.g., data management, programming, medical writing) to ensure timelines and quality of statistical deliverables

• Identify, evaluate, and promote the use and acceptance of innovative methods within and outside the organization, , through scientific collaborations, publications in scientific peer reviewed journals, presentations and chairing sessions at professional conferences

Commitment to Diversity and Inclusion / EEO:

Novartis is committed to building an outstanding, inclusive work environment and diverse team's representative of the patients and communities we serve.

Essential Requirements:

• MS or PhD (in Statistics or equivalent) with relevant work experience (depending on the level of the position)

• Fluent English oral and written

• Good communication and presentation skills

• Knowledge and expertise in Statistics; Skilled in statistical software packages (e.g. SAS, R)

• Able to work with a multidisciplinary team to achieve team's objective; Strong knowledge of drug

development and Health Authority guidelines

• Effective utilization of innovative statistics and quantitative analytics to influence assigned trial/program team decision
