

Analytical Expert (Associate Director, Science & Technology)

Job ID
REQ-10022687
Oct 10, 2024
Switzerland

Summary

Location: Basel, Switzerland

Role Purpose:

Chemical & Analytical Development (CHAD) plays an essential role in the development of processes for manufacturing and analysis. We are looking for an experienced new colleague with a strong background in analytical chemistry and good communication skills. You will take a leading role defining ways of working with external partners.

About the Role

Role Responsibilities:

- With your strong expertise in analytical development, you take a leading role in supporting analytical control strategies and standards for externalized Drug Substance manufacturing activities (incl. starting materials, intermediates, in-process-control)
- Further, you will support coordination of cGMP related activities at our partners to ensure externalized manufacture under cGMP in a timely and straight forward manner
- As a core member of a cross-functional team, you collaborate closely with our internal and external partners to ensure delivery of new drugs to our patients
- Further, you will support and guide external partners providing relevant process documentation in support of dossier filing
- In this role you also actively participate in scientific exchange groups within Novartis as well as maintaining excellent collaborations with our customers and external partners

What you'll bring to the team:

- Scientific curiosity coupled with recognized achievements in the development of analytical methods using advanced detection technologies (e.g. UHPLC, GC, SFC and related hyphenated techniques including high resolution MS)
- Dedicated, thoughtful and flexible team working skills
- Strong communication and presentation skills allowing guidance in a scientific sound and compliant way of

working towards analytical chemistry teams at external partners

- Good knowledge of English (oral and written) is required, good command of German (spoken/ written) is desirable
- Excellent knowledge of laboratory and/or technical tools
- Good knowledge of analytical software and computer tools such as Office package

Desirable Requirements:

- We are looking for candidates with PhD in analytical chemistry
- Documented and relevant hands-on experience in characterization and release activities for starting materials, intermediates etc. related to small molecule Drug Substances
- A minimum of 3-5 years relevant professional experience in field of analytical development with a strong GMP background is required, preferably in drug substance development

Commitment to Diversity and Inclusion: Novartis is committed to building an outstanding, inclusive work environment and diverse teams' representative of the patients and communities we serve.
