

Asset Strategy Lead - Biologics Analysis (80-100%*)

Job ID
REQ-10023921
Sep 27, 2024
Switzerland

Summary

Location: Basel, Switzerland, or Cambridge, MASS, US

Lab Solutions & Scientific Services, situated within the Scientific Operations (SO) organization, is responsible for providing integrated programs and services that support our scientific community, and has a mission to enable the Novartis BioMedical Research's (BR) lab scientists to focus on science in the lab through data-driven, sustainable operational excellence and innovation. Lab Solutions & Scientific Services consists of four global sub-functions and this role provides global leadership working in the key area of lab equipment management.

We are now seeking an experienced Lab asset management expert, ideally with a strong Biology background to join us as a key member of the global Lab Equipment Management (LEM) program team.

About the Role

You will ensure the success of the end-to-end lab equipment management program by building strong partnerships with the local operations community, the Asset Strategy Governance Board (ASGB), equipment category SMEs, and other Biomedical Research stakeholders and support functions. Specifically, you will manage the Biomedical Research LEM program end-to-end within your category, including interactions with engaged third parties and support from the local Lab Equipment Operations team.

Responsibilities include:

- Coordinate and chair the global Asset Strategy Governance Board (ASGB) within your category.
- Develop a global equipment life cycle strategy within your category, collaborating with ASGB, SMEs, Disease Area/Finance Area operations, data analyst, lab equipment operations, procurement, and vendors. Regularly update and maintain the plan based on shifting priorities and changes.
- Document and maintain life cycle plans, ASGB decisions and guidance documents on Biomedical Research standards within your category, using standard templates within the LEM program.
- Report key LEM program performance indicators regularly
- Review and align equipment demand requests with the global strategy within your category, identifying opportunities for bundling and aligning priorities with finance across categories.
- Align with internal stakeholders on vendor negotiations for CapEx, global service contracts, and consumables with key vendors within your category.
- Prepare for Capital Acquisition Request (CAR) review at the Investment Review Meeting (IRM) for equipment with an overall strategy and life cycle plan and communicate approvals back to DAs/FAs.

- Coordinate bundled sourcing across Biomedical Research with involved DAs/FAs.
- Collaborate closely with finance to manage the budget for the equipment category based on global strategies and forecasting.

Minimum Requirements – What you will bring to the role

- Bachelors, Masters or equivalent in relevant scientific (ideally Biology) discipline with appropriate years of industry experience in a relevant field within drug discovery or related area.
- Proven experience in enterprise strategic planning and asset management.
- Strong technical skills and experience in the equipment category
- Excellent vendor relations management and negotiation skills
- Strong leadership skills and the ability to work cross-functionally with various teams and stakeholders.
- Ability to influence without authority and actively manage key stakeholders
- Project Management experience and Lean and Six Sigma experience a plus
- Ability to exercise independent discretion and judgment to solve problems as well as an ability to prioritize effectively in a fast-paced and dynamic environment.
- Strong understanding of the processes and protocols required in a scientific research organization.
- Proficiency in using IT tools to capture, manage and analyze data required (e.g. MS Excel, SharePoint & Access, Spotfire, SAP)
- Excellent communication skills with ability to present information to operations leadership and scientific customers (fluent English with German language considered an advantage)
- Demonstrated problem-solving and analytical skills and recommend process changes when appropriate
- Solution-oriented individual with a proven track record of problem solving
- Broad knowledge of discipline, methods and technologies

*Restrictions on flexible working arrangements may apply and will be discussed at interview if applicable

Accessibility and accommodation

Novartis is committed to working with and providing reasonable accommodation to all individuals.
