

Real Estate Lead, Data & Technology

Job ID
REQ-10025149
Oct 11, 2024
Czech Republic

Summary

We are looking for a Data & Technology Lead in the Real Estate domain, who possesses a solid skillset in delivering IT systems and solutions. You will drive the design, build, and delivery of IT systems from the business point of view, which will be build in-house or SaaS. You are also expected to help drive the delivery of data driven insights and solutions, supporting the strategic decision making and operational excellence of the domain.

About the Role

As a Real Estate Data & Technology Lead, you will:

- Possess proven experience of building and delivering IT solutions
- Have a good understanding on AWS services and ability to drive solutions with responsible teams
- Possess proven experience on working with various IT services (IAM services, Web Services, Network Services, Security and Vulnerability management etc.)
- Possess proven experience in building, delivering, and managing SaaS applications.
- Have previous exposure to product management concepts
- Support the establishment and maintenance of data quality management processes and tools, identifying and resolving data issues and anomalies.
- Aligning to Enterprise Data Management standards in Novartis, drive data analytics activities, using various tools and techniques to generate insights and recommendations for real estate portfolio optimization and performance improvement.
- Manage and execute data-related and technology implementation projects, collaborating with internal and external stakeholders, Enterprise Data Management function leads, and partners.
- Support the implementation of Novartis data governance policies and standards for the Real Estate domain, ensuring data quality, accuracy, completeness, and compliance.
- Stay updated on the latest trends and best practices in data management and governance, as well as identifying opportunities for innovation and improvements.

Essential Requirements:

- Minimum 5 years of relevant work experience, preferably in Technology deployment, Data Analytics, Data Management
- Hands on experience with AWS services
- Familiarity with IT Service Management framework
- Familiarity with Software Development Life Cycle
- Familiarity with Data Analytics products like Power BI or Data Bricks, Snowflake

- Solid background in Enterprise Data Management and Data Governance concepts
- Proven project and stakeholder management competencies / experiences
- Fluent spoken and written professional English is a must

Complementary Requirements:

- Proven experience with Data Quality Management as a framework and relevant DQM tools.
- Good understanding on Master Data Management and its concepts
- Familiarity with other industry standard Data Governance best practices
- Familiarity with GxP guidelines
- Proven experience working within the DCAM and / or DAMA frameworks
