Switzerland

About the Role

10 ! days - that is how long we in Cell & Gene Therapy treat a patient's T-cells, before returning them with the potential to save a patient's life. This is a unique and novel personalized treatment where we work with the patient's own cells during our production process. Not only are re-imagining medicine but we are also impacting on, saving and improving quality of life.

This role will help get our Cell & Gene Therapy product to reach our patient worldwide. Cell & Gene Therapy at Novartis is a very dynamic and innovative environment, focus on delivering bring therapy to the patient.

Your key responsibilities:

Your responsibilities include, but are not limited to:

- Perform Bio-Analytical testing such as Flow, ELISA, cell count, cell viability, residual bead assessment, qPCR, Potency, in collaboration with experienced team members, if necessary
- Perform all testing and activities compliantly following appropriate SOPs and procedures and maintain controls, reagents and reference standards to support testing
- Work on shifts covering daytime / evening and one or both weekend days
- Knowledge of LabWare LIMS and/or other QC data systems
- Ensure all activities in compliance with cGxP, incl. data integrity

Diversity & Inclusion / EEO

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Role Requirements

- Sample storage and management
- Knowledge of LabWare LIMS and/or other QC data systems

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together?
