

Data Science Innovation Postdoctoral Fellow, Translational Bioinformatics

Job ID
REQ-10009635
Jul 03, 2024
USA

Summary

We are thrilled to open applications for our Data Science Innovation Fellowship. This applied 3-year research program is set to change the way we approach drug discovery, offering fellows a unique chance to train in data science and AI for biomedical research. As a talented fellow, you will learn to apply your computational skills to make a difference for patients and reimagine medicine at Novartis.

About the Role

Internal Job Title: Innovation Postdoctoral Fellow

Location: onsite, Cambridge, MA

About the role:

We are thrilled to open applications for our Data Science Innovation Fellowship. This applied 3-year research program is set to change the way we approach drug discovery, offering fellows a unique chance to train in data science and AI for biomedical research. As a talented fellow, you will learn to apply your computational skills to make a difference for patients and reimagine medicine at Novartis.

Drug hunting is a team sport, and you will gain experience in DS&AI for drug discovery as part of a multi-disciplinary team in Biomedical Research. You will drive innovation by deploying cutting-edge data approaches in collaboration with a vibrant and diverse community of over 300 data scientists globally. The program provides a unique platform to work on real-world, biomedical data at scale, rarely accessible in academia. Under the guidance of experienced mentors, you'll embark on a journey of professional growth, benefiting from a tailored training program with built-in time for a mini sabbatical in other areas of Novartis and for attending conferences/workshops.

Biomedical Research is the home of a vibrant postdoctoral community connected through science and events supporting the professional growth of our fellows, including monthly seminars and an annual Research Day Symposium. Seize this chance to be at the forefront of Data science and AI and shape the future of drug discovery!

Molecular Diversity of Drugs in Systemic Immunological Diseases

We are seeking a highly motivated and skilled Computational/Bioinformatician Scientist to join our team to explore the molecular diversity of immunological diseases as their response to pharmacological interventions. The successful candidate will analyze multiple (omics) datasets, integrate them with clinical data, and

generate actionable insight

Start date: Fall 2024

Key responsibilities

As a Data Science Innovation Fellow, you will:

1. Perform comprehensive analysis of selected diseases across internal and public datasets to identify molecular correlates of disease severity and subgroups.
2. Analyze the molecular effect of pharmacological interventions across compounds and diseases to inform differentiation and indication expansion opportunities.
3. Analyze and harmonize diverse datasets to evaluate similarities and differences between internal and external assets.
4. Align research findings with scientific priorities and address key scientific questions
5. Contribute to the scientific narrative and publication strategy by providing insights and findings on molecular diversity of drugs in systemic immunological diseases.

Role requirements:

PhD in Bioinformatics, Computational Biology, or a Related Field: Candidates in the final year of their PhD thesis are also eligible to apply. Experience in analyzing Transcriptomic and genomic data (and/or other high-dimensional, biological data modalities) and a strong interest in expanding. Proficient in analyzing high-dimensional biological data modalities including transcriptomics and genomics. Advanced coding skills in R and/or Python, along with familiarity with common bioinformatics tools. Solid background in statistics and machine learning techniques. Ability to interpret complex biological data and formulate clear, testable hypotheses for experts in various fields. Demonstrated strong publication record or other notable scientific accomplishments such as awards, patents, or grants. Excellent analytical, communication, presentation, and organizational skills #DSIF

How to apply

Please submit your CV and cover letter by July 29th for consideration. Please ensure that your cover letter explains how this training program will contribute to achieving your career goals.

Why Novartis: Our purpose is to reimagine medicine to improve and extend people's lives and our vision is to become the most valued and trusted medicines company in the world. How can we achieve this? With our people. It is our associates that drive us each day to reach our ambitions. Be a part of this mission and join us! Learn more here: <https://www.novartis.com/about/strategy/people-and-culture>

You'll receive: You can find everything you need to know about our benefits and rewards in the Novartis Life Handbook: <https://www.novartis.com/careers/benefits-rewards>

Commitment to Diversity and Inclusion / EEO: The Novartis Group of Companies are Equal Opportunity Employers and take pride in maintaining a diverse environment. We do not discriminate in recruitment, hiring, training, promotion or other employment practices for reasons of race, color, religion, gender, national origin, age, sexual orientation, gender identity or expression, marital or veteran status, disability, or any other legally

protected status. We are committed to building diverse teams, representative of the patients and communities we serve, and we strive to create an inclusive workplace that cultivates bold innovation through collaboration and empowers our people to unleash their full potential.

The pay rate for this position at commencement of employment is expected to be \$82,000 per year; however, base pay offered may vary depending on multiple individualized factors, including market location, job-related knowledge, skills, and experience. The total compensation package for this position may also include other elements, including a sign-on bonus, restricted stock units, and discretionary awards in addition to a full range of medical, financial, and/or other benefits (including 401(k) eligibility and various paid time off benefits, such as vacation, sick time, and parental leave), dependent on the position offered. Details of participation in these benefit plans will be provided if an employee receives an offer of employment. If hired, employee will be in an "at-will position" and the Company reserves the right to modify base salary (as well as any other discretionary payment or compensation program) at any time, including for reasons related to individual performance, Company or individual department/team performance, and market factors.

Join our Novartis Network: If this role is not suitable to your experience or career goals but you wish to stay connected to hear more about Novartis and our career opportunities, join the Novartis Network here:
