

Senior Specialist IT OPS Manufacturing

Job ID
REQ-10037474
Jan 26, 2025
India

Summary

Technical Developer with data base expertise and project management skills is responsible for developing and maintaining technical solutions, managing projects, and ensuring the successful implementation of IT initiatives. This role involves working closely with cross-functional teams to deliver high-quality technical solutions and manage project timelines effectively.

About the Role

Major Accountabilities:

- Develop and maintain technical solutions (focusing on analytical datasets from various data sources), ensuring they meet business requirements and industry standards.
- Utilize SQL to manage, query, analyze and report data related to various IT projects.
- Manage project timelines, resources, and deliverables to ensure successful project completion.
- Collaborate with cross-functional teams, including IT, manufacturing, and quality assurance, to gather requirements to implement the enhancements as needed.
- Ensure data integrity and accuracy within technical solutions.
- Provide technical support and troubleshooting for IT solutions.
- Participate in the continuous improvement of IT solutions, identifying and implementing enhancements as needed.
- Document technical specifications, processes, and procedures related to IT solutions including its validation.

Minimum Requirements:

- Bachelor's degree in Engineering, Information Technology, or a related field.
- Minimum of 3 years of experience in SQL development and database management.

Work Experience:

- Strong experience in configuring and enhancing technical solutions related to evaluation of manufacturing process monitoring in near real time for Novartis.
- Experience in developing integration pattern for data aggregation from various data sources
- Strong project management skills with experience in managing IT projects.
- Experience with project and IT Business management tools such as ServiceNow, Microsoft Project or Jira.

Skills:

- Knowledge of manufacturing processes and quality assurance principles including validation.
- Exposure to Cloud data platform such as Snowflakes and manufacturing systems like MES.
- Ability to work independently and as part of a team.
- Data visualization tools such as Power BI.
- Problem-solving and analytical skills
- Communication and collaboration skills.
