Summary

About Global Clinical Operations: At GCO, we are the bridge that transforms great science into great medicine by delivering at scale with sustainable speed and quality.

About the Role: Are you passionate about driving technology roadmaps and enabling decision-making that directly impacts the success of Novartis? As a Sr. Spec. DDIT GCO BA, you will act as a consultant and advisor, providing guidance to improve complex global business processes, products, and services. You will lead end-to-end delivery of solutions that redefine how Novartis operates, working on strategic initiatives with a mandate to deliver impactful solutions.

About the Role

Role Responsibilities:

- Engage with GCO user communities to identify high-priority subject areas.
- Develop rationale and perform scoping assessments for project feasibility.
- Conduct stakeholder interviews to understand business process dependencies.
- Create end-to-end business process flow diagrams using tools like Visio, Miro, or enterprise architect.
- Identify gaps in existing functionality and review requirements with stakeholders.
- Develop comprehensive requirement specifications to estimate cost, time, and resources for solutions.
- Liaise with the service development team to suggest high-level functional solutions.
- Ensure stakeholder involvement in new services or major upgrades and maintain consistency and traceability between requirements, specifications, and testing.
- Perform change impact assessments and ensure adherence to security and compliance policies.
- Drive change management, support super user training, and ensure solutions are fit for purpose.

Role Requirements:

- University degree in Informatics, Computer Sciences, Life Sciences, or similar.
- Minimum of 10+ years of experience in the Pharma or IT industry.

- Expert understanding of business process analysis & design and system architecture concepts.
- Experience as a Product Owner for platforms or large complex solutions is an advantage.
- Proficient skills in global teams, collaboration, facilitation, negotiation, and conflict resolution.
- Working knowledge of product management and agile methodologies is an advantage. Knowledge of CSV lifecycle is an advantage
- Exposure to digital innovation projects and data strategy is an added advantage.
- Excellent oral and written communication skills, with the ability to deliver presentations effectively.
